

**Goodbye, Power Bills.
Hello, Smart Income!**

Double your feed-in tariff

WHAT WE DO

At Westside Energy, we have engaged with an electricity retailer to eliminate electricity bills, forever.

HOW DO WE DO THIS?

By installing a battery with your solar system, we then arrange to connect you to a Virtual Power Plant (VPP)

WHAT IS A VIRTUAL POWER PLANT (VPP)?

A VPP is a de-centralised network of solar-powered, battery-backed homes, that deliver excess energy back to the grid. Joining a VPP offers:

- Blackout protection
- Premium solar feed-in tariff rates
- Electricity buying – free battery recharges for households
- Energy Trading – unused battery energy sold at exceptional prices – for exceptional profit
- Range of other profit-making applications such as Frequency Control Ancillary Services (FCAS), Demand Response, Power Purchase Agreements (PPAs)

Your Bill Summary

Balance brought forward	\$113.82 CR
New Charges	\$18.94 CR
Account Balance	\$133.93 CR

Account in credit. Payment not required

To avoid a late payment fee of \$12.00, please pay by the due date.

- Thank you.

Moving Home? Just call us a week before your move. We'll get you set up and connected at your new place.
